9 Axon Enterprise Incorporated,

10 Plaintiff,

11 v.

12 Federal Trade Commission, et al.,

13 Defendants.  
14

No. CV-20-00014-PHX-DWL

**ORDER**

15 **INTRODUCTION**

16 Pending before the Court is Plaintiff Axon Enterprise, Inc.’s (“Axon”) motion for  
17 preliminary injunction. (Doc. 15.)

18 Axon sells various technological tools, including body-worn cameras, to police  
19 departments. In May 2018, Axon acquired one of its competitors. This acquisition  
20 prompted the Federal Trade Commission (“FTC”) to conduct an antitrust investigation. In  
21 January 2020, just as the FTC was about to initiate a formal administrative proceeding to  
22 challenge the acquisition, Axon filed this lawsuit, which seeks to enjoin the administrative  
23 proceeding based on three constitutional claims: *first*, that the FTC’s structure violates  
24 Article II of the Constitution because its commissioners are not subject to at-will removal  
25 by the President and its administrative law judges (“ALJs”), who are appointed by its  
26 commissioners, are also insulated from at-will removal; *second*, that the FTC’s combined  
27 role of “prosecutor, judge, and jury” during administrative proceedings violates the Due  
28 Process Clause of the Fifth Amendment; and *third*, that the FTC and the Antitrust Division

1 of the U.S. Department of Justice, which are both responsible for reviewing the antitrust  
2 implications of acquisitions but employ different procedures and substantive standards  
3 when conducting such review, utilize an arbitrary and irrational “clearance” process when  
4 deciding which agency will review a particular acquisition, in violation of the Equal  
5 Protection Clause of the Fifth Amendment. (Doc. 15 at 6-15.)<sup>1</sup>

6 The constitutional claims Axon seeks to raise in this case are significant and topical.  
7 Indeed, the Supreme Court recently held oral argument in a case that raises similar issues.  
8 *Seila Law LLC v. Consumer Fin. Prot. Bureau*, No. 19-7. This Court, however, is not the  
9 appropriate forum to address Axon’s claims. It is “fairly discernable” from the FTC Act  
10 that Congress intended to preclude district courts from reviewing the type of constitutional  
11 claims Axon seeks to raise here—instead, Axon must raise those claims during the  
12 administrative process and then renew them, if necessary, when seeking review in the Court  
13 of Appeals. Thus, this Court lacks subject matter jurisdiction over this action, Axon’s  
14 request for a preliminary injunction must be denied, and this action must be dismissed.

## 15 BACKGROUND

### 16 I. Factual Background

17 Axon, which was formerly known as TASER International, Inc., is a Delaware  
18 corporation that sells various technological tools, including body-worn cameras and cloud-  
19 computing software, to police departments. (Doc. 1 ¶¶ 13, 19-21; Doc. 15-2 ¶ 2.) In May  
20 2018, Axon acquired one of its competitors, Viewu. (Doc. 1 ¶ 24.) The next month, the  
21 FTC notified Axon that it was investigating the acquisition. (*Id.* ¶ 25.) Axon cooperated  
22 with the investigation over the next 18 months. (*Id.* ¶ 26.) Axon contends that it “spent in  
23 excess of \$1.6 million responding to the FTC’s investigational demands, including attorney  
24 and expert fees, ESI production and related hosting and third-party vendor fees and  
25 expenses.” (Doc. 15-2 at 3 ¶ 5.)

26  
27 <sup>1</sup> In its reply, Axon clarifies that it “is not challenging the mere fact of concurrent  
28 jurisdiction, but rather the arbitrary way in which the agencies determine which of two  
vastly different (and often outcome-determinative) procedures will be applied to a  
particular company.” (Doc. 21 at 2 n.1.)

1           Axon contends that, at the conclusion of the investigation, the FTC gave it a choice.  
2 First, it could agree to a “blank check” settlement that would rescind its acquisition of  
3 Viewu and transfer some of its intellectual property to the newly restored Viewu. (Doc. 1  
4 ¶ 27.) According to Axon, the FTC’s “vision” was to turn Viewu into a “clone” of Axon—  
5 “something Viewu never was nor could be without impermissible government regulation.”  
6 (*Id.*) Second, if Axon declined those terms, the FTC would pursue an administrative  
7 complaint against Axon. (*Id.*)

## 8       II. Procedural History

9           On January 3, 2020, Axon filed this lawsuit. (Doc. 1). In its complaint, Axon  
10 outlines the factual history discussed above and alleges a violation of its Fifth Amendment  
11 rights to due process and equal protection (*id.* ¶¶ 57-60), alleges that the FTC’s structure  
12 violates Article II of the Constitution (*id.* ¶¶ 61-62), and seeks a declaration that its  
13 acquisition of Viewu didn’t violate any antitrust laws (*id.* ¶¶ 63-69).

14           Also on January 3, 2020 (but later that day), the FTC filed an administrative  
15 complaint challenging Axon’s acquisition of Viewu. (Doc. 15 at 2 n.1.) An evidentiary  
16 hearing in the administrative proceeding was originally scheduled for May 19, 2020. (Doc.  
17 22 at 2.) That hearing has now been continued until late June 2020.

18           On January 9, 2020, Axon filed a motion for a preliminary injunction, seeking to  
19 enjoin further FTC proceedings against it. (Doc. 15.)

20           On January 23, 2020, the FTC filed an opposition to Axon’s motion. (Doc. 19.)  
21 The FTC relegated the merits of Axon’s constitutional claims to a footnote and instead  
22 focused on whether the Court possesses subject matter jurisdiction. (Doc. 19 at 1, 14 n.12).

23           On January 30, 2020, Axon filed a reply. (Doc. 21.) That same day, Axon filed a  
24 motion for expedited consideration. (Doc. 22.) Over the FTC’s opposition (Doc. 23), the  
25 Court granted the motion and scheduled oral argument for April 1, 2020. (Doc. 24.)

26           On March 10, 2020 the Court issued a tentative order. (Doc. 29.)

27           On March 27, 2020, the New Civil Liberties Alliance (“NCLA”) filed a motion for  
28 leave to submit an amicus brief in support of Axon. (Doc. 32.) That motion was granted.

1 (Doc. 33.)

2 On April 1, 2020, the Court heard oral argument. (Doc. 39.)<sup>2</sup>

3 On April 2, 2020, Axon supplemented the record by filing certain documents  
4 generated during the administrative proceeding. (Doc. 40.)

### 5 ANALYSIS

6 “Subject-matter limitations on federal jurisdiction serve institutional interests. They  
7 keep the federal courts within the bounds the Constitution and Congress have prescribed.”  
8 *Ruhrgas AG v. Marathon Oil Co.*, 526 U.S. 574, 583 (1999). “[C]ourts have an  
9 ‘independent obligation’ to police their own subject matter jurisdiction.” *Animal Legal*  
10 *Def. Fund v. U.S. Dep’t of Agric.*, 935 F.3d 858, 866 (9th Cir. 2019) (citation omitted). *See*  
11 *also* Fed. R. Civ. Proc. 12(h)(3) (“If the court determines at any time that it lacks subject-  
12 matter jurisdiction, the court must dismiss the action.”).

13 In general, district courts “have original jurisdiction of all civil actions arising under  
14 the Constitution, laws, or treaties of the United States.” 28 U.S.C. § 1331. This includes  
15 the authority to “declare the rights and other legal relations of any interested party seeking  
16 such a declaration.” *Id.* § 2201. “This grant of jurisdiction, however, is not absolute.”  
17 *Kerr v. Jewell*, 836 F.3d 1048, 1057 (9th Cir. 2016). Among other things, Congress can  
18 “preclude[] district court jurisdiction” over claims pertaining to the conduct of an  
19 administrative agency by creating a review framework that evinces a “fairly discernable”  
20 intent to require such claims “to proceed exclusively through the statutory review scheme.”  
21 *Id.* at 1057-58 (citation omitted). *See also Bennett v. SEC*, 844 F.3d 174, 178 (4th Cir.  
22 2016) (“Congress can . . . impliedly preclude jurisdiction by creating a statutory scheme of  
23 administrative adjudication and delayed judicial review in a particular court.”).

24 The issue here is whether Congress, by enacting the FTC Act, intended to require  
25 constitutional challenges to the FTC’s structure and processes to be brought via the FTC  
26 Act’s adjudicatory framework. If so, this Court lacks subject matter jurisdiction to

---

27 <sup>2</sup> Due to the COVID-19 pandemic, the Court allowed counsel for the FTC and NCLA  
28 to attend the hearing telephonically. (Docs. 31, 34.) Additionally, the Court allowed media  
organizations and members of the public to listen to the hearing telephonically. (Doc. 37.)

1 entertain Axon’s claims.

2 I. Background Law

3 On three occasions between 1994 and 2012, the Supreme Court addressed whether  
4 Congress’s enactment of a scheme of administrative adjudication should be interpreted as  
5 an implicit decision by Congress to preclude district court jurisdiction. Although none of  
6 those decisions involved the FTC Act, they control the analysis here. *Cf. Bennett*, 844 F.3d  
7 at 178-81 (identifying these cases as “the trilogy”).

8 The first decision, *Thunder Basin Coal Co. v. Reich*, 510 U.S. 200 (1994), addressed  
9 the preclusive effect of the Federal Mine Safety and Health Amendments Act of 1977  
10 (“Mine Act”). Thunder Basin, a coal company, objected to a Mine Act regulation that  
11 required it to post the names of certain union representatives. *Id.* at 203-04. Rather than  
12 seek review of the regulation through the Mine Act’s judicial-review scheme, which  
13 contemplates that “[c]hallenges to enforcement [will be] reviewed by the Federal Mine  
14 Safety and Health Review Commission . . . and by the appropriate United States court of  
15 appeals,” Thunder Basin filed a lawsuit in federal district court in which it argued that the  
16 Mine Act’s review scheme violated its due process rights under the Fifth Amendment. *Id.*  
17 at 204-06. The district court issued an injunction in Thunder Basin’s favor but the Supreme  
18 Court reversed, concluding that the district court lacked subject matter jurisdiction over the  
19 action. *Id.* at 205-07.

20 The Court held that when a statutory scheme, such as the Mine Act, “allocate[s]  
21 initial review to an administrative body” and authorizes only “delayed judicial review,”  
22 courts must analyze three factors—(1) “the statute’s language, structure, and purpose,” (2)  
23 “its legislative history,” and (3) “whether the claims can be afforded meaningful review”—  
24 when assessing whether Congress’s intent to “preclude initial judicial review” can be  
25 “fairly,” if impliedly, “discerned” from the statutory scheme. *Id.* at 207. The Court then  
26 analyzed these factors and concluded that all three supported a finding of preclusion.

27 First, the Court noted that the Mine Act creates a “detailed structure” for regulated  
28 parties to seek review of enforcement activity under the Act—a mine operator is entitled

1 to challenge an adverse agency order before an ALJ, then seek review of the ALJ's order  
2 before the Federal Mine Safety and Health Review Commission, and then, if necessary,  
3 seek review of any adverse decision by the Commission in a federal Court of Appeals. *Id.*  
4 at 207-08. This structure, the Court concluded, "demonstrates that Congress intended to  
5 preclude challenges such as the present one." *Id.* at 208. The Court also noted that the  
6 Mine Act contains provisions that enable the Secretary of Labor (who is responsible for  
7 enforcing the Mine Act) to file an action in district court when seeking certain types of  
8 relief. *Id.* at 209. Because "[m]ine operators enjoy no corresponding right," the Court  
9 concluded these provisions served as further proof of Congress's intent to preclude. *Id.*

10 Second, the Court stated that "[t]he legislative history of the Mine Act confirms this  
11 interpretation." *Id.* at 209-11.

12 Third, the Court addressed whether a finding of preclusion would result, "as a  
13 practical matter," in the elimination of Thunder Basin's ability "to obtain meaningful  
14 judicial review" of its claims. *Id.* at 213 (quotation omitted). The Court concluded that no  
15 such risk was present because Thunder Basin's "statutory and constitutional claims . . . can  
16 be meaningfully addressed in the Court of Appeals." *Id.* at 215. In reaching this  
17 conclusion, the Court observed that "[t]he Commission has addressed constitutional  
18 questions in previous enforcement proceedings" but clarified that, "[e]ven if this were not  
19 the case," the availability of eventual review by an appellate court was sufficient. *Id.*

20 The second component of the trilogy, *Free Enterprise Fund v. Public Co.*  
21 *Accounting Oversight Bd*, 561 U.S. 477 (2010), addressed the preclusive effect of the  
22 Sarbanes-Oxley Act of 2002 ("the Sarbanes-Oxley Act") and its interaction with the  
23 Securities Exchange Act. Among other things, the Sarbanes-Oxley Act created an entity  
24 called the Public Company Accounting Oversight Board ("PCAOB"), which was tasked  
25 with providing "tighter regulation of the accounting industry." *Id.* at 484. The PCAOB  
26 was composed of five members who were appointed by the Securities and Exchange  
27 Commission ("the Commission"). *Id.* The PCAOB's broad regulatory authority included  
28 enforcing not only the Commission's rules, but also "its own rules," and it possessed the

1 authority to “issue severe sanctions in its disciplinary proceedings, up to and including the  
2 permanent revocation of a firm’s registration, a permanent ban on a person’s associating  
3 with any registered firm, and money penalties of \$15 million.” *Id.* at 485.

4 The plaintiff in *Free Enterprise Fund* was a Nevada accounting firm that been  
5 investigated by the PCAOB and then criticized in a report issued by the PCAOB. *Id.* at  
6 487. In a lawsuit filed in federal district court, the accounting firm argued that the  
7 PCAOB’s structure was unconstitutional because its board members, as well as the  
8 Commission members who appointed them, were shielded from Presidential control. *Id.*  
9 The district court concluded it had subject matter jurisdiction over the lawsuit but rejected  
10 the accounting firm’s constitutional claim on the merits. *Id.* at 488. The Supreme Court  
11 reversed, agreeing with the district court’s jurisdictional analysis but concluding that, on  
12 the merits, the PCAOB’s structure was unconstitutional.

13 When addressing the jurisdictional issue, the Court cited *Thunder Basin* as  
14 supplying the relevant standards but concluded that, under those standards, jurisdiction was  
15 not precluded. *Id.* at 489-91. Central to the Court’s analysis was the fact that the relevant  
16 adjudicatory framework didn’t provide for judicial review over all of the PCAOB’s  
17 activities. Specifically, the Commission was only empowered “to review any [PCAOB]  
18 rule or sanction.” *Id.* at 489. Commission action, in turn, could receive judicial review  
19 under 15 U.S.C. § 78y. *Id.* This structure was underinclusive, the Court stated, because it  
20 “provides only for judicial review of *Commission* action, and not every Board action is  
21 encapsulated in a final Commission order or rule.” *Id.* Put another way, the Court did “not  
22 see how [the accounting firm] could meaningfully pursue [its] constitutional claims”  
23 because the conduct it wished to challenge (*e.g.*, the PCAOB’s release of the critical report)  
24 “is not subject to judicial review.” *Id.* at 489-90. Thus, the Court concluded that Congress  
25 did not intend to “strip the District Court of jurisdiction over these claims.” *Id.* at 491.

26 The final component of the trilogy, *Elgin v. Dep’t of Treasury*, 567 U.S. 1 (2012),  
27 addressed the preclusive effect of the Civil Service Reform Act of 1978 (“CSRA”). The  
28 CSRA is a “comprehensive system for reviewing personnel action taken against federal

1 employees.” *Id.* at 5 (quotation omitted). Under the CSRA, an employer seeking to  
2 terminate (or pursue certain other adverse employment actions against) a covered employee  
3 must provide notice, representation, an opportunity to respond, and a reasoned decision.  
4 *Id.* at 5-6. An employee who disagrees with the agency’s decision may seek review by the  
5 Merit Systems Protection Board (“MSPB”). *Id.* at 6. And an employee who disagrees with  
6 the MSPB’s decision may seek judicial review in the Federal Circuit. *Id.*

7 In *Elgin*, a male employee was terminated because he hadn’t registered with the  
8 Selective Service. *Id.* at 6-7. The employee appealed to the MPSB, arguing that the statute  
9 requiring men (but not women) to register with the Selective Service is unconstitutional,  
10 but the employee didn’t seek further review in the Federal Circuit after the MSPB rejected  
11 his claim—instead, he (and others) filed a lawsuit in federal district court raising the same  
12 constitutional challenge and requesting various forms of equitable relief, including  
13 reinstatement. *Id.* The district court concluded it had jurisdiction to resolve the  
14 constitutional claim but the Supreme Court reversed, holding that “the CSRA precludes  
15 district court jurisdiction over petitioners’ claims even though they are constitutional  
16 claims for equitable relief.” *Id.* at 8.

17 The Court began by reaffirming that, under *Thunder Basin*, “the appropriate  
18 inquiry” when evaluating whether Congress intended to preclude district court jurisdiction  
19 “is whether it is ‘fairly discernible’ from the [statute] that Congress intended [litigants] to  
20 proceed exclusively through the statutory review scheme, even in cases in which the  
21 [litigants] raise constitutional challenges to federal statutes.” *Id.* at 8-10. Next, the Court  
22 “examined the CSRA’s text, structure, and purpose.” *Id.* at 10-11. After discussing the  
23 various forms of review available under the statute, the Court concluded that “[g]iven the  
24 painstaking detail with which the CSRA sets out the method for covered employees to  
25 obtain review of adverse employment actions, it is fairly discernible that Congress intended  
26 to deny such employees an additional avenue of review in district court.” *Id.* at 11-12. The  
27 Court also noted that the CSRA expressly allows employees to assert one particular type  
28 of claim in federal district court. *Id.* at 13 (citing 5 U.S.C. § 7702(b)(2)). The existence of

1 this provision, the Court stated, “demonstrates that Congress knew how to provide  
2 alternative forums for judicial review based on the nature of an employee’s claim. That  
3 Congress declined to include an exemption . . . for challenges to a statute’s constitutionality  
4 indicates that Congress intended no such exception.” *Id.*

5 The Court also addressed whether a preclusion finding would effectively “foreclose  
6 all meaningful judicial review” of the plaintiffs’ constitutional claim. *Id.* at 15-21 (citing  
7 *Free Enterprise Fund*, 561 U.S. at 489). The Court concluded that such a risk was not  
8 present, even though “the MSPB has repeatedly refused to pass upon the constitutionality  
9 of legislation,” because the Federal Circuit, “an Article III court fully competent to  
10 adjudicate [constitutional] claims,” could address those constitutional claims during the  
11 final stage of the statutory review process. *Id.* at 16-18. The Court also rejected the notion  
12 that the Federal Circuit would be hamstrung by an inadequately developed record when  
13 conducting this review, explaining that “[e]ven without factfinding capabilities, the Federal  
14 Circuit may take judicial notice of facts relevant to the constitutional question” and noting  
15 that “we see nothing extraordinary in a statutory scheme that vests reviewable factfinding  
16 authority in a non-Article III entity that has jurisdiction over an action but cannot finally  
17 decide the legal question to which the facts pertain.” *Id.* at 19-21.

18 II. Whether It Is “Fairly Discernable” From The FTC Act That Congress Intended To  
19 Preclude District Court Jurisdiction Over Axon’s Constitutional Challenges

20 With this backdrop in mind, the Court will turn to the FTC Act. Nothing in the FTC  
21 Act expressly divests district courts of jurisdiction to entertain constitutional claims of the  
22 sort raised by Axon in this action, but *Thunder Basin*, *Free Enterprise Fund*, and *Elgin* all  
23 recognize that Congress may implicitly preclude such jurisdiction through the enactment  
24 of an administrative review scheme. The question here is whether such intent is “fairly  
25 discernable” from the FTC Act. *Thunder Basin*, 510 U.S. at 207 (citation omitted).

26 A. **Text, Structure, And Purpose Of The FTC Act**

27 Under *Thunder Basin* and its progeny, the first factor to consider when assessing  
28 “[w]hether a statute is intended to preclude initial judicial review” is “the statute’s

1 language, structure, and purpose.” *Thunder Basin*, 510 U.S. at 207. This factor strongly  
2 supports a finding of preclusion in this case.

3 The text and structure of the FTC Act closely resemble those of the Mine Act, which  
4 was the statutory scheme at issue in *Thunder Basin*. The FTC Act sets out a detailed  
5 scheme for preventing the use of unfair methods of competition. 15 U.S.C. § 45(a)-(b).  
6 Additionally, the FTC Act’s enforcement provisions create timelines and mechanisms for  
7 adjudicating alleged violations that are similar to those outlined in the Mine Act. *Compare*  
8 15 U.S.C. § 45(b) *with* 30 U.S.C. § 815. Finally, and most important, the FTC Act’s  
9 judicial review process is similar to the Mine Act’s, up to and including conferring  
10 “exclusive jurisdiction” upon the relevant Court of Appeals to affirm, modify, or set aside  
11 final agency orders. *Compare* 15 U.S.C. § 45(c)-(d) *with* 30 U.S.C. § 816(a). In *Thunder*  
12 *Basin*, the Supreme Court held that this type of “detailed structure” suggested “that  
13 Congress intended to preclude challenges such as the present one.” 510 U.S. at 208.  
14 Similarly, in *Elgin*, the Supreme Court held when a statutory scheme sets out in  
15 “painstaking detail” the process for aggrieved parties to obtain review of adverse decisions,  
16 “it is fairly discernible that Congress intended to deny such employees an additional avenue  
17 of review in district court.” 567 U.S. at 11-12. The FTC Act has a “detailed structure” that  
18 includes “painstaking detail” concerning how to seek review, so the same inference arises  
19 here. *Cf. Hill v. SEC*, 825 F.3d 1236, 1242 (11th Cir. 2016) (concluding that a review  
20 scheme “materially indistinguishable” from that in *Thunder Basin* demonstrated  
21 congressional intent to preclude district court jurisdiction).<sup>3</sup>

22 The FTC Act also contains a provision authorizing the FTC (but not regulated  
23 parties) to file a lawsuit in federal district court. *See* 15 U.S.C. § 53(a) (authorizing the  
24 FTC to “bring suit in a district court of the United States” when certain conditions are  
25 satisfied). In *Thunder Basin*, the Supreme Court stated that an inference of preclusive

---

26  
27 <sup>3</sup> In its reply, Axon points out several ways in which the text, structure, and purpose  
28 of the FTC Act arguably differ from the text, structure, and purpose of the CSRA. (Doc.  
21 at 4-5.) However, Axon does not attempt to make such a showing with respect to the  
Mine Act.

1 effect arose because the Mine Act allowed the Secretary of Labor to file certain claims in  
2 district court but “[m]ine operators enjoy no corresponding right.” 510 U.S. at 209. *See*  
3 *also Elgin*, 567 U.S. at 13 (provision allowing employees to file claims in district court  
4 showed that “Congress knew how to provide alternative forums for judicial review based  
5 on the nature of an employee’s claim. That Congress declined to include an  
6 exemption . . . for challenges to a statute’s constitutionality indicates that Congress  
7 intended no such exception.”). So, too, here.

8 Finally, the purpose of the FTC Act suggests that Congress intended to preclude  
9 district court jurisdiction. Congress intended the FTC to act as a successor to the Interstate  
10 Commerce Commission and enforce “its broad mandate to police unfair business conduct.”  
11 *FTC v. AT&T Mobility LLC*, 883 F.3d 848, 854 (9th Cir. 2018). To that end, “Congress  
12 deliberately gave the FTC broad enforcement powers.” *Id.* This is similar to the Mine  
13 Act’s purpose of “strengthen[ing] and streamlin[ing] health and safety enforcement  
14 requirements,” *Thunder Basin*, 510 U.S. 221, as well as the CSRA’s purpose of introducing  
15 an “integrated scheme of administrative and judicial review” to “replace an outdated  
16 patchwork of statutes and rules,” *Elgin*, 567 U.S. at 13-14 (citation omitted). In other  
17 words, where Congress acts to introduce a statutory scheme that brings order from chaos,  
18 it indicates that Congress intended to preclude district court jurisdiction. The FTC Act was  
19 such an attempt.<sup>4</sup>

20 ...

21 ...

---

23 <sup>4</sup> This conclusion is bolstered by the slate of recent cases concluding that the SEC’s  
24 authorizing legislation precludes district court jurisdiction over constitutional challenges  
25 to the SEC’s structure. *See, e.g., Bennett*, 844 F.3d at 181-82; *Hill*, 825 F.3d at 1242-1245;  
26 *Tilton v. SEC*, 824 F.3d 276, 282-81 (2d Cir. 2016); *Jarkesy v. SEC*, 803 F.3d 9, 16-17  
27 (D.C. Cir. 2015); *Bebo v. SEC*, 799 F.3d 765 (7th Cir. 2015). Although those decisions are  
28 not binding here, their logic is persuasive. The review provisions of the FTC Act are  
“materially indistinguishable,” *Hill*, 825 F.3d at 1242, and “nearly identical,” *Jarkesy*, 803  
F.3d at 16, to those contained in 15 U.S.C. § 78y, which itself resembles the review  
provisions in the Mine Act. Thus, the Court is not persuaded by the NCLA’s colorful  
argument that *Bennett*, *Hill*, *Tilton*, *Jarkesy*, and *Bebo* were all wrongly decided and this  
Court should not “follow the herd of courts off the cliff in disregarding the jurisdictional  
significance of *Free Enterprise*.” (Doc. 32-2 at 21.)

1           **B. Legislative History Of The FTC Act**

2           *Thunder Basin* suggests the second relevant preclusion factor is the underlying  
3 statute’s legislative history. 510 U.S. at 207. However, Justice Scalia, joined by Justice  
4 Thomas, issued a concurring opinion in *Thunder Basin* objecting to the consideration of  
5 legislative history as part of the preclusion analysis, stating that such consideration only  
6 “serve[d] to maintain the illusion that legislative history is an important factor in this  
7 Court’s deciding of cases, as opposed to an omnipresent makeweight for decisions arrived  
8 at on other grounds.” *Id.* at 219 (Scalia, J., concurring).

9           The Supreme Court’s subsequent decisions in this area, *Free Enterprise Fund* and  
10 *Elgin*, did not address (much less focus on) legislative history, and the Supreme Court has  
11 issued subsequent opinions in other contexts that reject the use of legislative history as a  
12 legitimate interpretative tool. *See, e.g., Epic Sys. Corp. v. Lewis*, 138 S.Ct. 1612, 1631  
13 (2018) (“[L]egislative history is not the law. It is the business of Congress to sum up its  
14 own debates in its legislation, and once it enacts a statute [w]e do not inquire what the  
15 legislature meant; we ask only what the statute means.”) (citations and internal quotation  
16 marks omitted). Thus, it is unclear whether this portion of *Thunder Basin* retains validity.  
17 Indeed, the FTC does not mention legislative history in its response brief (Doc. 19) and  
18 Axon barely mentions it its reply (Doc. 21 at 4 [criticizing the FTC for failing to “point to  
19 legislative history for the FTC Act that is similar to the CSRA’s”]).

20           In any event, to the extent legislative history remains a relevant consideration, and  
21 to the extent it is possible to draw any meaningful conclusions from the FTC Act’s  
22 legislative history (which the Court doubts), it tends to support the inference that Congress  
23 sought to preclude district court jurisdiction over the type of claims presented here. Judicial  
24 review of final, and only final, FTC actions was a component of the FTC Act from its  
25 earliest iterations. *See* Marc Winerman, *The Origins of the FTC: Concentration,*  
26 *Cooperation, Control, and Competition*, 71 Antitrust L. J. 1, 4 (2003). The debate focused  
27 on the breadth of judicial review and settled on the standard contained in § 45 to this day:  
28 deference to the FTC’s findings of fact, but otherwise silent. *Id.* at 5, 76-77, 80 (discussing

1 the FTC Act’s proponents’ “essential faith in the workings of a commission”), 90-92. It  
2 does not appear Congress ever considered amending the FTC Act to route complaints  
3 through any process other than administrative proceedings. *Id.*

#### 4 C. Availability Of Meaningful Review And Associated Considerations

5 In *Thunder Basin*, the Supreme Court identified the third preclusion factor as  
6 “whether the claims can be afforded meaningful review” and then addressed—in the  
7 portion of the opinion concerning this factor—whether the claims were “wholly collateral”  
8 to the statute’s review provisions and whether the claims fell outside the agency’s  
9 expertise. 510 U.S. at 207, 212-15. However, in both *Elgin* and *Free Enterprise Fund*, the  
10 Supreme Court seemed to frame the third factor as a conjunctive, three-part test involving  
11 consideration of (1) whether a finding of preclusion would foreclose all meaningful judicial  
12 review; (2) whether the suit is “wholly collateral” to a statute’s review provisions; and (3)  
13 whether the claims are “outside the agency’s expertise.” *Elgin*, 567 U.S. at 15-16; *Free*  
14 *Enterprise Fund*, 561 U.S. at 489-90. It is therefore unclear whether these are distinct  
15 factors or simply different ways of addressing the same thing.

16 Although the Ninth Circuit has not resolved this issue, other appellate courts have  
17 recognized its “unsettled” nature and concluded that “the most critical thread in the case  
18 law is . . . whether the plaintiff will be able to receive meaningful judicial review without  
19 access to the district courts.” *Bebo*, 799 F.3d at 774. *See also Hill*, 825 F.3d at 1245 (“We  
20 agree with the Second and Seventh Circuits that the first factor—meaningful judicial  
21 review—is ‘the most critical thread in the case law.’”) (citation omitted). The Court agrees  
22 and will follow the same approach here.

#### 23 1. Availability Of Meaningful Review

24 Axon’s overarching argument is that this case “is materially indistinguishable” from  
25 *Free Enterprise Fund* and that “the FTC Act affords no meaningful review of Axon’s  
26 claims outside this lawsuit.” (Doc. 21 at 2-5.) This argument is unavailing.

27 As noted, *Free Enterprise Fund* focused on the fact that the PCAOB could engage  
28 in some forms of regulatory activity, including the issuance of reports, that were effectively

1 immune from judicial review due to a mismatch in the administrative review scheme—the  
2 SEC could only review a “rule or sanction” promulgated by the PCAOB, “and not every  
3 Board action is encapsulated in a final Commission order or rule.” 561 U.S. at 489.

4 This sort of mismatch is not present under the FTC Act, at least with respect to the  
5 constitutional claims Axon seeks to raise here.<sup>5</sup> Fundamentally, Axon believes the FTC  
6 shouldn’t be allowed to investigate or challenge its acquisition of Viewu. Yet these are  
7 claims that Axon can present during the pending administrative proceeding—indeed, Axon  
8 has now presented them<sup>6</sup>—and then renew, if necessary, when seeking review of the FTC’s  
9 final cease-and-desist order in a federal appellate court. Critically, Axon acknowledges  
10 that it “could, in theory, raise its constitutional claims on appeal from an adverse  
11 Commission order” and merely argues that the availability of such review “is irrelevant”  
12 because “the Commission rules do not allow Axon to depose the DOJ officials who  
13 participated in the clearance process without first getting the permission of the FTC-  
14 appointed ALJ” and “there will be no guarantee of an administrative record that will allow  
15 a reviewing court to decide those claims.” (Doc. 21 at 7-8.) But these are essentially the  
16 same arguments the Supreme Court rejected in *Thunder Basin* and *Elgin*, which hold that  
17 the eventual availability of review in a federal appellate court—even if preceded by  
18 litigation before administrative bodies that refused to consider or develop the constitutional  
19 claims—is sufficient. *Thunder Basin*, 510 U.S. at 213-15 (finding of preclusion warranted  
20 because Thunder Basin’s “statutory and constitutional claims . . . can be meaningfully  
21 addressed in the Court of Appeals,” “[e]ven if” the agency has a track record of refusing to  
22 consider such claims during the administrative proceeding); *Elgin*, 567 U.S. at 16-21 (no  
23 risk that finding of preclusion would foreclose meaningful review, even though “the MSPB

24  
25 <sup>5</sup> During oral argument, Axon emphasized that the Court must conduct an  
26 independent preclusion analysis as to each of its three constitutional claims. The Court has  
27 done so and concludes, for the reasons discussed below, that Axon may obtain meaningful  
28 review of each claim through the FTC’s administrative framework, that none of the three  
claims is wholly collateral to the FTC Act’s review provisions, and that the FTC’s agency  
expertise could be brought to bear on each claim.

<sup>6</sup> See FTC Doc. No. D9389, Answer and Defenses of Respondent Axon Enter. Inc.,  
Affirmative Defenses 14-18. This document is available [here](#).

1 has repeatedly refused to pass upon the constitutionality of legislation,” because the Federal  
2 Circuit, “an Article III court fully competent to adjudicate [constitutional] claims,” could  
3 address those claims during the final stage of the statutory review process or remand to the  
4 MSPB with instructions to receive the necessary evidence).

5 Similarly, here, if the FTC issues an adverse decision and Axon seeks further  
6 review, the Ninth Circuit can take judicial notice of facts that bear upon Axon’s  
7 constitutional claims. *Singh v. Ashcroft*, 393 F.3d 903, 905 (9th Cir. 2004) (holding that,  
8 even though a statute limited the Ninth Circuit to reviewing the administrative record, “it  
9 is nonsense to suppose that we are so cabined and confined that we cannot exercise the  
10 ordinary power of any court to take notice of facts that are beyond dispute”). And if the  
11 facts needed by the Ninth Circuit are beyond judicial notice, the FTC Act specifically  
12 provides that “the court may order such additional evidence to be taken before the [FTC]  
13 and to be adduced upon the hearing in such manner and upon such terms and conditions as  
14 to the court may seem proper.” 15 U.S.C. § 45(c). In other words, “there is nothing  
15 extraordinary in a statutory scheme that vests reviewable authority in a non-Article III  
16 entity that has jurisdiction over an action but cannot finally decide the legal question to  
17 which the facts pertain.” *Elgin*, 567 U.S. at 19. *See also Bank of La. v. FDIC*, 919 F.3d  
18 916, 925-928 (5th Cir. 2019) (rejecting claim that statute did not provide for meaningful  
19 judicial review because the administrative proceedings only allowed “limited discovery”).

20 Axon attempts to escape this conclusion by narrowly focusing on particular aspects  
21 of the FTC’s conduct and arguing that those aspects are effectively immune from judicial  
22 review. For example, Axon argues that “the clearance decision, which put the FTC, rather  
23 than the DOJ, in charge of the Axon/Viewu merger,” was an effectively unreviewable  
24 decision that “caused real harm before any administrative action was filed.” (Doc. 21 at  
25 6.) Axon also contends in a footnote that the mere fact of “being regulated” by the FTC is  
26 a cognizable injury. (*Id.* at 6 n.4.)

27 The problem with these arguments is that they are divorced from the facts of this  
28 case. Even assuming *arguendo* that a company that was investigated by the FTC for

1 acquiring a competitor, spent money complying with the FTC’s investigative demands, and  
2 ultimately persuaded the FTC not to oppose the acquisition might lack an effective  
3 mechanism for challenging the constitutionality of the FTC’s investigatory effort (because  
4 there would be no administrative proceeding in which to raise those claims), Axon stands  
5 in different shoes here. It didn’t file this lawsuit in mid-2018, upon the FTC’s initiation of  
6 the investigation. Instead, it filed suit 18 months later, mere hours before the FTC initiated  
7 an administrative proceeding against it (which Axon was apparently racing to the  
8 courthouse to beat). Thus, unlike the accounting firm in *Free Enterprise Fund*, which had  
9 its reputation impugned by a critical report issued by the PCAOB but could not challenge  
10 that report in any subsequent administrative proceeding, here Axon can raise (and has  
11 raised) all of its constitutional challenges, including its challenge to the clearance process,  
12 during the FTC administrative proceeding<sup>7</sup> and may renew those challenges when seeking  
13 review by a federal appellate court. *See* 15 U.S.C. § 45(c)-(d) (an entity dissatisfied with  
14 an FTC cease-and-desist order may seek review in the court of appeals “within any circuit  
15 where the method of competition or the act or practice in question was used or where such  
16 person, partnership, or corporation resides or carries on business,” and the appellate court  
17 thereafter has exclusive jurisdiction to “affirm, enforce, modify, or set aside orders of the  
18 Commission”).

19 Axon also contends that the absence of effective judicial review is demonstrated by  
20 the fact that it (like the accounting firm in *Free Enterprise Fund*) filed this lawsuit before  
21 the initiation of administrative proceedings. (Doc. 21 at 3 & n.3.) This argument overlooks  
22 that the plaintiff in *Thunder Basin* also filed a pre-enforcement challenge, yet the Supreme

---

23 <sup>7</sup> Following oral argument, Axon filed documents showing that the attorneys  
24 representing the FTC in the administrative proceeding have refused to comply with Axon’s  
25 requests for discovery pertaining to the FTC/DOJ clearance process. (Doc. 40.) These  
26 documents do not alter the “meaningful review” analysis for two reasons. First, the  
27 documents only reflect the existence of a discovery dispute between counsel that has not  
28 yet been brought to the ALJ’s attention. The ALJ could, at least theoretically, side with  
Axon and order the FTC’s counsel to produce the requested discovery materials. Second,  
even if Axon is barred from seeking clearance-related discovery during the administrative  
proceeding, *Thunder Basin* and *Elgin* hold that the appellate courts’ eventual ability to  
consider constitutional claims during the final stage of the review process and, if necessary,  
remand for additional fact-finding means that “meaningful review” remains available.

1 Court still concluded that conferring jurisdiction upon the district court would “be inimical  
2 to the structure and purpose” of the comprehensive statutory review scheme. *Thunder*  
3 *Basin*, 510 U.S. at 781. *Free Enterprise Fund* did not overrule *Thunder Basin* on this point.  
4 561 U.S. at 490-91. *See also Hill*, 825 F.3d at 1249 (“[I]t makes no difference that the  
5 Gray respondents filed their complaint in the face of an impending, rather than extant,  
6 enforcement action. The critical fact is that the Gray respondents can seek full  
7 postdeprivation relief under § 78y.”); *Great Plains Coop v. Commodity Futures Trading*  
8 *Comm’n*, 205 F.3d 353, 355 (8th Cir. 2000) (“Great Plains’s complaint is an impermissible  
9 attempt to make an ‘end run’ around the statutory scheme. Allowing the target of an  
10 administrative complaint simply to file for an injunction in a federal district court  
11 would . . . allow the plaintiff to short-circuit the administrative review process and the  
12 development of a detailed factual record by the agency.”).

13 Finally, the NCLA identifies three cases—(1) *Lucia v. SEC*, 138 S. Ct. 2044 (2018),  
14 (2) *McNary v. Haitian Refugee Ctr., Inc.*, 498 U.S. 479 (1991), and (3) *Veterans for*  
15 *Common Sense v. Shinseki*, 678 F.3d 1013 (9th Cir. 2012)—as purportedly showing that  
16 district courts possess jurisdiction to resolve the sort of constitutional challenges Axon  
17 seeks to raise here (Doc. 32-2).<sup>8</sup> All three decisions are easily distinguishable.

18 In *Lucia*, the petitioner had been charged with securities law violations by the SEC.  
19 138 S.Ct. at 2049-50. During the ensuing administrative proceeding, Lucia sought to raise  
20 a constitutional challenge—he argued the SEC ALJ presiding over his case hadn’t been  
21 appointed in the manner required by the Appointments Clause of Article II of the  
22 Constitution. *Id.* This challenge went nowhere during the administrative proceeding  
23 (which resulted in the imposition of a \$300,000 fine and a lifetime ban from the securities  
24 industry), but Lucia renewed it when seeking review by the D.C. Circuit (which also  
25 rejected it) and again when seeking review in the Supreme Court. *Id.* at 2050-51. The  
26 Supreme Court agreed with Lucia on the merits of his Appointments Clause claim, *id.* at

27  
28 <sup>8</sup> Axon did not cite *Lucia* or *Shinseki* in its motion or reply but did include one citation  
to *McNary*. (Doc. 15 at 11.)

1 2051-55, and then stated that “[t]he only issue left is remedial.” *Id.* at 2055. Because Lucia  
2 had raised a “timely challenge” by “contest[ing] the validity of [the ALJ’s] appointment  
3 before the Commission, and continued pressing that claim in the Court of Appeals and [the  
4 Supreme Court],” the Court concluded he was entitled to a new hearing before a different,  
5 properly-appointed ALJ. *Id.* at 2055-56.

6 It is curious that the NCLA views *Lucia* as supporting Axon’s jurisdictional claims.  
7 Unlike Axon, the petitioner in *Lucia* didn’t file a preemptive lawsuit in federal court when  
8 he learned the SEC would be pursuing an administrative proceeding against him. Instead,  
9 he raised his constitutional claims during the administrative proceeding and then renewed  
10 them when seeking review of the agency’s final decision in an appellate court. Indeed, the  
11 Supreme Court identified his conscientious compliance with the requirements of the  
12 administrative-review scheme as a reason why he was entitled to relief. Although Lucia  
13 and his counsel may, understandably, view the relief that was ultimately granted in *Lucia*  
14 as less-than-meaningful in practice,<sup>9</sup> the *Lucia* decision itself—to the extent it says  
15 anything about implicit preclusion—tends to reaffirm the Supreme Court’s holdings in  
16 *Thunder Basin* and *Elgin* that eventual review in an appellate court is meaningful review.

17 Next, in *McNary*, a group of undocumented aliens filed an action in district court  
18 asserting that the Immigration and Naturalization Service had committed a pattern and  
19 practice of constitutional violations when administering a particular immigration benefit  
20 program. 498 U.S. at 483-84. The question presented in *McNary* was whether section  
21 210(e) of the Immigration and Nationality Act (“INA”), “which bars judicial review of  
22 individual determinations except in deportation proceedings, also forecloses this general  
23 challenge to the INS’[s] unconstitutional practices.” *Id.* at 491. The Supreme Court  
24 concluded the district court possessed jurisdiction over the pattern-and-practice lawsuit

25 \_\_\_\_\_  
26 <sup>9</sup> The NCLA, which “now represents Ray Lucia,” argues that his “odyssey belies  
27 blithe statements that eventual, possible appellate review is ‘meaningful review’ for [a  
28 claim alleging] a defect in the tribunal itself.” (Doc. 32-2 at 14.) Likewise, Axon’s counsel  
stressed during oral argument that a years-long administrative and appellate process that  
might result in a redo of the entire process couldn’t possibly amount to meaningful review.  
Although the Court doesn’t discount these sentiments, they find no support in *Lucia*, *Elgin*,  
and *Thunder Basin*, which the Court must follow.

1 because: (1) the plain language of section 210(e) only barred jurisdiction over lawsuits  
2 challenging “the denial of an individual application” and thus did not, by implication,  
3 encompass “general collateral challenges to unconstitutional practices and policies used by  
4 the agency in processing applications” (*id.* at 491-92); (2) the statute also contained a  
5 provision requiring appellate courts to limit their review to the administrative record, yet  
6 the type of administrative record created in an individual case<sup>10</sup> would be meaningless in a  
7 pattern-and-practice case (*id.* at 492-94); and (3) Congress could have mirrored “more  
8 expansive” language from other statutes, so its choice to use narrower language in section  
9 210(e) was suggestive of an intent to allow the plaintiffs’ claim to proceed (*id.* at 494).  
10 Additionally, the Court noted:

11 [B]ecause there is no provision for direct judicial review of the denial [of the  
12 requested benefit] . . . unless the alien is later apprehended and deportation  
13 proceedings are initiated, most aliens denied [the requested benefit] can  
14 ensure themselves review in courts of appeals only if they voluntarily  
15 surrender themselves for deportation. Quite obviously, that price is  
tantamount to a complete denial of judicial review for most undocumented  
aliens.

16 *Id.* at 496-97.

17 There are at least four reasons why this case is different from, and not controlled by,  
18 *McNary*. First, because *McNary* addressed whether an affirmative jurisdiction-stripping  
19 statute encompassed a certain type of claim, the Court performed a textual analysis that  
20 turned on the wording of the statutory provision in question.<sup>11</sup> Here, the question isn’t  
21 whether Axon’s claims fall within some provision of the FTC Act that attempts to strip  
22 district courts of jurisdiction over certain categories of claims. Instead, the question is  
23 whether the existence of the regulatory scheme itself evinces an implicit judgment by

24 \_\_\_\_\_  
25 <sup>10</sup> Specifically, that record would “consist[] solely of a completed application form, a  
26 report of medical examination, any documents or affidavits that evidence an applicant’s  
agricultural employment and residence, and notes, if any, from [a Legalization Office]  
interview.” *Id.* at 493.

27 <sup>11</sup> The provision at issue in *McNary*, codified at 8 U.S.C. § 1160(e)(1), provides:  
28 “There shall be no administrative or judicial review of a determination respecting an  
application for adjustment of status under this section except in accordance with this  
subsection.”

1 Congress that district court jurisdiction should be precluded. Second, and in a related vein,  
2 *McNary* was decided before *Thunder Basin*, *Free Enterprise Fund*, and *Elgin*, which are  
3 the key cases addressing the topic of implicit preclusion. To the extent there is any conflict  
4 between *McNary* and the trilogy, the later-decided cases control. Third, the appellate-  
5 review provisions of section 210(e) of the INA and the FTC Act are materially different—  
6 the former requires appellate courts to limit their review to the administrative record while  
7 the latter specifically allows appellate courts to remand for additional fact-finding.<sup>12</sup> *Cf.*  
8 *Elgin*, 567 U.S. at 21 n.11 (distinguishing *McNary* because it involved “a statutory review  
9 scheme that provided no opportunity for the plaintiffs to develop a factual record relevant  
10 to their constitutional claims before the administrative body and then restricted judicial  
11 review to the administrative record created in the first instance,” whereas “the CSRA  
12 review process is not similarly limited”). Fourth, and finally, an adverse jurisdictional  
13 ruling in *McNary* would have required the plaintiffs to voluntarily surrender for deportation  
14 in order to pursue their claims. *Axon*, in contrast, does not have to “bet the farm” to obtain  
15 review—it can raise its constitutional claims during the existing administrative proceeding.  
16 *See, e.g., Jarkesy*, 803 F.3d at 20-21 (distinguishing *McNary* on this ground); *Bebo*, 799  
17 F.3d at 775 n.3 (same).

18 Last, in *Shinseki*, the plaintiffs brought a class action against the Department of  
19 Veterans Affairs (“VA”), arguing that “the VA’s handing of mental health care and service-  
20 related disability claims deprives [the plaintiffs] of property in violation of the Due Process  
21 Clause of the Constitution and violates the VA’s statutory duty to provide timely medical  
22 care and disability benefits.” 678 F.3d at 1017. The Ninth Circuit addressed whether “the

---

23  
24 <sup>12</sup> Compare 8 U.S.C. § 1160(e)(3)(B) (“Such judicial review shall be based solely  
25 upon the administrative record established at the time of the review by the appellate  
26 authority and the findings of fact and determinations contained in such record shall be  
27 conclusive unless the applicant can establish abuse of discretion or that the findings are  
28 directly contrary to clear and convincing facts contained in the record considered as a  
whole.”) with 15 U.S.C. § 45(c) (“If either party shall apply to the court for leave to adduce  
additional evidence, and shall show to the satisfaction of the court that such additional  
evidence is material and that there were reasonable grounds for the failure to adduce such  
evidence in the proceeding before the Commission, the court may order such additional  
evidence to be taken before the Commission and to be adduced upon the hearing in such  
manner and upon such terms and conditions as to the court may seem proper.”).

1 Veterans' Judicial Review Act ['VJRA'] . . . deprives us of jurisdiction over these claims.”

2 *Id.* at 1019. The court explained:

3 [T]he VJRA supplies two independent means by which we are disqualified  
4 from hearing veterans' suits concerning their benefits. First, Congress has  
5 expressly disqualified us from hearing cases related to VA benefits in [38  
6 U.S.C.] § 511(a) . . . and second, Congress has conferred exclusive  
7 jurisdiction over such claims to the Veterans Court and the Federal Circuit.

8 *Id.* at 1022-23. With this backdrop in mind, the court concluded the district court lacked  
9 jurisdiction over the plaintiffs' first two claims, which related to mental health care (*id.* at  
10 1026-28) and disability benefit claims (*id.* at 1028-32). However, with respect to the  
11 plaintiffs' final claim—a constitutional challenge to the procedures employed by VA  
12 regional offices—the court concluded it fell outside the VJRA's jurisdiction-stripping  
13 provision because (1) as a textual matter, section 511(a) only precludes judicial review of  
14 “‘decisions’ affecting the provision of benefits to any individual claimants,” yet the  
15 plaintiffs “do[] not challenge decisions at all. A consideration of the constitutionality of  
16 the procedures in place, which frame the system by which a veteran presents his claims to  
17 the VA, is different than a consideration of the decisions that emanate through the course  
18 of the presentation of those claims”; and (2) “the VJRA does not provide a mechanism by  
19 which the organizational plaintiffs here might challenge the absence of system-wide  
20 procedures, which they contend are necessary to afford due process. . . . Because [the  
21 plaintiffs] would be unable to assert [their] claim in the review scheme established by the  
22 VJRA, that scheme does not operate to divest us of jurisdiction.” *Id.* at 1033-35 (internal  
23 citation omitted).

24 *Shinseki* is distinguishable for many of the same reasons as *McNary*. It addressed  
25 whether an affirmative jurisdiction-stripping statute should, as a textual matter, be  
26 construed to encompass a particular type of claim and emphasized that an adverse ruling  
27 would effectively preclude the plaintiffs from ever raising their claim. Here, the question  
28 is whether the FTC Act evinces an implied intent to preclude district court jurisdiction and  
an adverse ruling wouldn't preclude Axon from raising its claims—it has already done so  
in the pending administrative proceeding and can renew them, if necessary, when seeking

1 review in an appellate court.

2 2. Wholly Collateral

3 The next consideration is whether the claim is “wholly collateral” to the statute’s  
4 review provisions. Unfortunately, “the reference point for determining whether a claim is  
5 ‘wholly collateral’ is not free from ambiguity.” *Bennett*, 844 F.3d at 186. “Neither *Elgin*  
6 nor *Free Enterprise Fund* clearly defines the meaning of ‘wholly collateral.’” *Bebo*, 799  
7 F.3d at 773.

8 Since *Elgin*, courts seeking to assess whether a claim is “wholly collateral” have  
9 taken two approaches. *Bebo*, 799 F.3d at 773-74. First, some courts have looked to “the  
10 relationship between the merits of the constitutional claim and the factual allegations  
11 against the plaintiff.” *Id.* at 773. These courts have taken their cue from *Free Enterprise*  
12 *Fund*, which concluded that the accounting firm’s claims were “wholly collateral” because  
13 they were unrelated to “any . . . orders or rules from which review might be sought.” 561  
14 U.S. at 489-491. As a result, these courts have concluded that a claim is wholly collateral  
15 if the basis for the claim would exist regardless of the merits decision of the agency. *Hill*  
16 *v. SEC*, 114 F. Supp. 3d 1297, 1309 (N.D. Ga. 2015) (“What occurs at the administrative  
17 proceeding and the SEC’s conduct there is irrelevant to this proceeding which seeks to  
18 invalidate the entire statutory scheme.”); *Duka v. SEC*, 103 F. Supp. 3d 382, 391 (S.D.N.Y.  
19 2015) (“Similarly, [plaintiff] contends that her Administrative Proceeding may not  
20 constitutionally take place, and she does not attack any order that may be issued in her  
21 administrative proceeding relating to the outcome of the SEC action.”) (internal quotations  
22 omitted); *Gupta v. SEC*, 796 F. Supp. 2d 503, 513 (S.D.N.Y. 2011) (“These  
23 allegations . . . would state a claim even if Gupta were entirely guilty of the charges made  
24 against him in the OIP.”). Notably, these courts have either been directly overruled or had  
25 their holdings called into serious doubt. *Hill*, 825 F.3d at 1252; *Tilton*, 824 F.3d at 291.

26 Second, other courts have looked to *Elgin* when evaluating the meaning of “wholly  
27 collateral.” *Bebo*, 799 F.3d at 774. These courts seize on *Elgin*’s conclusion that the claims  
28 in that case were not wholly collateral because they were “the vehicle by which [plaintiffs]

1 seek to reverse the removal decision, to return to federal employment, and to receive  
2 compensation.” 567 U.S. at 22. The Courts of Appeals that have chosen between these  
3 two approaches have unanimously favored the second approach. *Bennett*, 844 F.3d at 187  
4 (“However, we think the second reading is more faithful to the more recent Supreme Court  
5 precedent . . . .”); *Tilton*, 824 F.3d at 288 (“The appellants’ Appointments Clause claim  
6 arose directly from that enforcement action and serves as an affirmative defense within the  
7 proceeding.”); *Jarkesy*, 803 F.3d at 23 (“Here, [plaintiff’s] constitutional and APA claims  
8 do not arise ‘outside’ the SEC administrative enforcement scheme—they arise from actions  
9 the Commission took in the course of that scheme. And they are the ‘vehicle by which’  
10 Jarkesy seeks to prevail in his administrative proceeding.”) (quoting *Elgin*, 567 U.S. at 22).

11         These approaches can be viewed as two sides of the same inquiry. *Free Enterprise*  
12 *Fund*’s “wholly collateral” finding turned on the fact that the accounting firm’s claims were  
13 “collateral to any . . . orders or rules from which review might be sought.” 561 U.S. at 490.  
14 In other words, the fact the accounting firm was seeking to challenge agency action beyond  
15 the scope of what was reviewable under the statutory scheme is what rendered its claims  
16 collateral. *Id.* *Elgin* focused on whether the claims at issue were “the vehicle by which  
17 [plaintiffs] seek to reverse” adverse action. 567 U.S. at 22. That is, both cases looked to  
18 whether there was a way for the plaintiff to challenge the agency conduct at issue. No such  
19 vehicle existed in *Free Enterprise Fund*—the claims which the accounting firm sought to  
20 bring had no path to judicial review. In contrast, the *Elgin* plaintiffs did have a path to  
21 judicial review and they could have raised their constitutional claims in the course of that  
22 path.

23         The best way to harmonize *Free Enterprise Fund* and *Elgin* is to conclude that the  
24 “wholly collateral” consideration turns on whether a vehicle exists (or could exist) for the  
25 plaintiff ultimately to receive judicial review of its constitutional claim. If no vehicle  
26 exists, the claim is “wholly collateral” to the review scheme, and this consideration would  
27 weigh in favor of a district court exercising jurisdiction. This does “reduce[] the factor’s  
28 independent significance,” but it is “more faithful to the more recent Supreme Court

1 precedent” and harmonizes seemingly discordant case law. *Bennett*, 844 F.3d at 187. *See*  
2 *also Tilton*, 824 F.3d at 288; *Jarkesy*, 803 F.3d at 27 (“[T]he possibility that [an agency]  
3 order in [plaintiff’s] favor might moot some or all of his challenges does not make those  
4 challenges ‘collateral’ and thus appropriate for review outside the administrative  
5 scheme. . . . [T]hat possibility [is] a *feature* . . . not a bug.”) (quotation omitted).

6 Given this backdrop, there is no merit to Axon’s argument that its constitutional  
7 claims are “wholly collateral” to the issues to be adjudicated during the administrative  
8 proceeding because its “claims (just like those in *Free Enterprise Fund*) go to the agency’s  
9 constitutional authority” and “do not ‘arise[] out of’ an enforcement proceeding.” (Doc.  
10 21 at 9-10.) Because Axon can assert (and already has asserted) its constitutional claims  
11 during the administrative proceeding, and because Axon retains the ability to seek further  
12 review of those claims in a federal appellate court, those claims are not “wholly collateral”  
13 to the FTC Act’s review provisions. This logic also disposes of Axon’s contention, raised  
14 during oral argument, that its constitutional challenge to the clearance process is “wholly  
15 collateral” because the clearance process isn’t even enshrined in the FTC Act—Axon’s  
16 ability to raise this challenge as part of the enforcement proceeding shows it isn’t “wholly  
17 collateral” under *Elgin*.

18 Finally, one additional clarification is necessary with respect to the concept of  
19 “wholly collateral” claims. Axon’s briefing can be interpreted as suggesting its claims are  
20 wholly collateral because they are constitutional in nature. (Doc. 21 at 8-9.) But in *Elgin*,  
21 the Supreme Court expressly rejected “a jurisdictional rule based on the nature of an  
22 employee’s constitutional claim.” 567 U.S. at 15. Creating such a rule would “deprive the  
23 aggrieved employee, the [agency], and the district court of clear guidance about the proper  
24 forum for the employee’s claims at the outset of the case” because the line between  
25 constitutional challenges to statutes and other types of constitutional challenges was “hazy  
26 at best.” *Id.* Likewise, *Elgin* rejected a rule that would have reserved “facial constitutional  
27 challenges to statutes” for district courts. *Id.* At bottom, “exclusivity does not turn on the  
28 constitutional nature of” a claim. *Id.* *Thunder Basin* reached a similar conclusion, holding

1 that because a due process challenge “can be meaningfully addressed in the Court of  
2 Appeals,” the mere fact the plaintiff had asserted a constitutional challenge was insufficient  
3 to establish district court jurisdiction. 510 U.S. at 215.

4 *Thunder Basin* and *Elgin*, in short, foreclose the possibility that the Court has  
5 jurisdiction over Axon’s due process and equal protection claims simply because they are  
6 constitutional in nature—*Thunder Basin* precluded jurisdiction over a due process claim,  
7 510 U.S. at 215, and *Elgin* precluded jurisdiction over an equal protection claim, 567 U.S.  
8 at 7, 16. *See also Bebo*, 799 F.3d at 768 (district court lacked jurisdiction even though  
9 plaintiff sought to challenge a statute as “facially unconstitutional under the Fifth  
10 Amendment because it provides the SEC ‘unguided’ authority to choose which respondents  
11 will and which will not receive the procedural protections of a federal district court, in  
12 violation of equal protection and due process guarantees”).

13 The potential wrinkle is that Axon is also asserting an Article II claim, which was  
14 not raised in *Thunder Basin* or *Elgin* but was the claim at issue in *Free Enterprise Fund*.  
15 Despite that wrinkle, the logic of *Elgin* extends to preclude jurisdiction over that claim  
16 here. *Elgin* was concerned with a lack of clarity when it came to deciding whether  
17 jurisdiction was precluded and rejected “hazy” line drawing. 567 U.S. at 15. For example:

18 [P]etitioners contend that facial and as-applied constitutional challenges to  
19 statutes may be brought in district court, while other constitutional challenges  
20 must be heard by the [agency]. But, as we explain below, that line is hazy at  
21 best and incoherent at worst. The dissent’s approach fares no better. The  
22 dissent carves out for district court adjudication only facial constitutional  
23 challenges to statutes, but we have previously stated that “the distinction  
24 between facial and as-applied challenges is not so well defined that it has  
25 some automatic effect or that it must always control the pleadings and  
26 disposition in every case involving a constitutional challenge.

27 *Id.* (citation omitted). Axon’s Article II claim, at bottom, attacks the for-cause removal  
28 protection for FTC commissioners (15 U.S.C. § 41) and ALJs (5 U.S.C. § 7521). (Doc. 15  
at 12-14.) In other words, Axon brings a facial constitutional challenge to a statute. *Elgin*  
makes clear that the facial nature of the claim is not, alone, enough to establish district  
court jurisdiction. The weight of authority from outside the Ninth Circuit supports this

1 conclusion. *Hill*, 825 F.3d at 1246 (“Whether an injury has constitutional dimensions is  
2 not the linchpin in determining its capacity for meaningful judicial review.”); *Jarkesy*, 803  
3 F.3d at 403 (“In any case, assuming *arguendo* that Jarkesy put forth a non-delegation  
4 doctrine challenge, he is wrong to assign it talismanic significance. He seems to assume  
5 that whenever a respondent in an administrative proceeding attacks a statute on its face, a  
6 district court has jurisdiction to hear the challenge, whereas the agency does not. That is  
7 mistaken.”).

### 8 3. Agency Expertise

9 “The final consideration within the *Thunder Basin* framework” is whether Axon’s  
10 claims “fall[] outside the [FTC’s] expertise.” *Tilton*, 824 F.3d at 289. *See also Elgin*, 567  
11 U.S. at 22. This factor looks to “whether agency expertise could be brought to bear on the  
12 questions presented.” *Hill*, 825 F.3d at 1251 (internal quotation marks and alterations  
13 omitted). Like the other considerations, this consideration requires a full understanding of  
14 the *Thunder Basin* trilogy.

15 *Free Enterprise Fund* concluded that agency expertise played no role because the  
16 accounting firm’s constitutional claims were not “fact-bound inquiries” and its statutory  
17 claims did “not require ‘technical considerations of [agency] policy.’” 561 U.S. at 419  
18 (citing *Johnson v. Robison*, 415 U.S. 361, 373 (1974)). In contrast, *Elgin* rejected the  
19 argument that the plaintiffs’ constitutional arguments were outside the statutory scope of  
20 review because that argument “overlook[ed] the many threshold questions that may  
21 accompany a constitutional claim and to which the [agency] can apply its expertise.” 567  
22 U.S. at 22. Resolution of substantive arguments that did fall under the agency’s expertise  
23 in favor of a plaintiff could “avoid the need to reach his constitutional claims.” *Id.* In other  
24 words, the ability to “fully dispose of the case” before reaching the constitutional claims  
25 was an example of an agency’s expertise being brought to bear. *Id.*

26 Again, *Free Enterprise Fund* and *Elgin* can be difficult to harmonize. The Courts  
27 of Appeals that have recognized this tension have generally opted to apply *Elgin*’s  
28 approach to the agency expertise consideration. *Bennett*, 844 F.3d at 187-88; *Hill*, 825

1 F.3d at 1250-51; *Tilton*, 824 F.3d at 289-290; *Jarkesy*, 803 F.3d at 28-29; *Bebo*, 799 F.3d  
2 at 772-73. Those courts reasoned that *Elgin* was the latest and more comprehensive  
3 assessment of the agency expertise factor, so its interpretation controlled. In following  
4 *Elgin*, those courts concluded that “[agency] expertise can otherwise be brought to bear”  
5 and that the plaintiffs’ claims, including structural Article II claims, were subject to the  
6 statutory review scheme.

7 That said, *Free Enterprise Fund* and *Elgin* must be read as complementary, and thus  
8 the question isn’t which standard controls, but where Axon’s claims fall in the spectrum  
9 they create. The apparent conflict arises because *Elgin*, although its rule is clear, was not  
10 dealing with the sort of structural challenge that was raised in *Free Enterprise Fund*. If  
11 *Elgin*’s rule were applied as some courts have described it, agency expertise could be  
12 brought to bear in any case, which is an outcome that would conflict with *Free Enterprise*  
13 *Fund* and *Thunder Basin*. On the other hand, carving out a “*Free Enterprise Fund*  
14 exception” based on the content of a specific claim would run counter to *Elgin*’s reasoning,  
15 which is the Supreme Court’s most recent formulation of the agency expertise  
16 consideration.

17 The key to harmonizing *Free Enterprise Fund* and *Elgin* is that the agency expertise  
18 analysis in *Free Enterprise Fund* was driven by the fact that, for the accounting firm to  
19 obtain judicial review through the statutory scheme, it would have had to force the issue  
20 by willfully and intentionally violating a rule and then raising the only defense possible—  
21 that the agency was unconstitutional. Only then would the accounting firm’s claims be  
22 before the SEC and subject to judicial review. 561 U.S. at 491. In contrast, in *Elgin*, the  
23 agency had several avenues through which it could obviate the need to reach a  
24 constitutional question. 567 U.S. at 22.

25 The same is true here. Axon maintains it has done nothing wrong. The FTC, in  
26 applying its own expertise, may agree. Thus, as in *Elgin*, there may be no need for a federal  
27 appellate court to reach Axon’s constitutional claims. Were Axon forced to forego any  
28 defense other than its constitutional claims, then, and only then, would Axon be in the same

1 position as the plaintiff in *Free Enterprise Fund*. Here, though, Axon has substantive  
2 defenses that may obviate the need to reach the constitutional question. It has not willfully  
3 broken a rule in order to vindicate its constitutional claims, nor does it need to do so. Thus,  
4 matters remain that would benefit from the FTC’s expertise.

5 Axon argues the FTC cannot bring its expertise to bear because there is no way  
6 Axon can win—the FTC is so hopelessly biased that any litigant is doomed to lose. (Doc.  
7 21 at 10.) Yet even if the FTC incorrectly rules against Axon during the administrative  
8 proceeding, “there are precious few cases involving interpretation of statutes authorizing  
9 agency action in which [a court’s] review is not aided by the agency’s statutory  
10 construction.” *Mitchell v. Christopher*, 996 F.3d 375, 379 (D.C. Cir. 1993). Additionally,  
11 the FTC’s alleged win rate is something of a red herring—nothing in the *Thunder Basin*  
12 trilogy suggests that a court conducting a jurisdictional-preclusion analysis must begin by  
13 gathering statistics concerning the particular agency’s “win rate” and then use those  
14 statistics as a metric for evaluating whether the review being provided is truly meaningful.<sup>13</sup>

17 ...

18 ...

19 ...

20 ...

21 ...

22 ...

---

23 <sup>13</sup> In addition to lacking any support in the case law, this approach would also raise  
24 practical problems. For example, although Axon asserts that the FTC has a 100% win rate,  
25 some law review articles suggest that “FTC opinions that were appealed by losing  
26 respondents were reversed 20 percent of the time compared to a 5-percent reversal rate for  
27 such opinions appealed from district courts [in cases brought by the DOJ’s Antitrust  
28 Division].” Terry Calvani & Angela M. Diveley, *The FTC at 100: A Modest Proposal for  
Change*, 21 GEO. MASON L. REV. 1169, 1181 (2014). During oral argument, Axon argued  
this law review article is misleading because “it includes cases that go all the way back to  
1976” and there haven’t been any appellate reversals of the FTC in recent years. It is  
unclear how courts would go about choosing which temporal cutoffs to employ if “win  
rate” statistics were truly part of the analysis.

Accordingly, **IT IS ORDERED** that:

(1) Axon's complaint (Doc. 1) is **dismissed without prejudice** due to a lack of subject matter jurisdiction.

(2) Axon's motion for preliminary injunction (Doc. 15) is **denied as moot**.

(3) The Clerk of the Court shall enter judgment accordingly and terminate this action.

Dated this 8th day of April, 2020.
