Trademark Law

Allen’s Trademark Digest
Locate trademark cases that aid in drafting litigation and opinion documents and keep up with current state of law. Allen’s Trademark Digest organizes, classifies and analyzes both published and unpublished decisions from the Trademark Trial and Appeal Board (TTAB) and Trademark Commissioner.

Guide to Registering Trademarks, Steven H. Bazerman, Jason M. Drangel
Provides the nuts and bolts of working within the USPTO registration framework for trademarks including selection of appropriate forms to use, how to fill them out, and how to communicate with the USPTO. Also provides information on the international framework for registering trademarks. Includes a chapter on trademark licensing and actual sample forms used in practice.

Guide to TTAB Practice, Jeffery A. Handelman
Takes you step-by-step through practice before the Trademark Trial and Appeals Board. The author provides practical guidance on appearing before this specialized court based upon his expertise and “on the ground” experience.

Trademark Law Guide, Explanations are provided by Thomas P. Arden

Trademark Law and Litigation

Trademark Law: Protection, Enforcement, and Licensing, Adam Brookman
Hands-on treatise discussing the most critical information concerning trademarks. Author uses a conversational-style to outline the decision on what to trademark, how to go about registering it, how to defend it and the business issues involved in the process.

Patent Law

Biotechnology & Pharmaceutical Patents: Law & Practice, Marc S. Gross, S. Peter Ludwig, Julie R. O’Sullivan
Application of Patent Law in the context of Biotech and Pharma patents as business assets in order to maximize their value and ensure their protection.

Business Method Patents, Gregory A. Stobbs
Discusses the mechanics of the preparing the patent application (including necessary drawings), drafting claims, and enforcing and licensing business method patents.

Federal Circuit Annual Review, Alston Bird
Annual offering that looks at and analyzes Federal Circuit decisions from the previous year. Includes e-mail update of important cases.

Generic & Innovator Drugs, A Guide to FDA Approval Requirements, 7th Ed., Donald O. Beers
In-depth coverage of the FDA approval process with insight into the regulatory environment surrounding drugs.

Practical guidance on protecting chemical and pharmaceutical inventions with discussion of eligibility, genetic engineering, biotechnological patents, novelty, obviousness, patent review, patent term extensions, enforcement of patent rights, infringement defenses, transfer of invention rights, and patent termination.
Patent Claim Construction, Robert C. Kahrl
Illustrates pertinent topics in claim construction such as how to craft the language for a patent claim on the patent application, what to include, and how to defend the claim.

Patent Disputes: Litigation, Forms & Analysis, Gregory J. Battersby, Charles W. Grimes
Sample forms and checklists for patent disputes, including sample motions, sample discovery documents, sample appeals documents and practice tips on the forms in the treatise. Sample forms included.

Patent Interference Practice Handbook, Jerome Rosenstock
Provides practical step-by-step guidance through every stage of the patent interference process; analyzes decisions of the U.S. Patent Office with attention to the priority determination criteria that apply in all NAFTA and WTO member countries.

Patent Practice Forms, Peter S. Canelias
Provides sample USPTO patent forms and explanations on their use. Optimizes a practitioner’s time and effectiveness by helping make sense of all the necessary USPTO forms involved in patent practice.

Software Patents, 2nd Ed., Gregory A. Stobbs
Breaks down the process for drafting software patent specifications and claims allowing for applications that will be approved and that will stand in court if challenged. Discusses who holds software patents and for what inventions and the steps that can be taken to protect software inventions in the worldwide marketplace.

Transferring Invention Rights: Effective and Enforceable Contracts, Jerome Rosenstock
Practical guidance to general contract law geared to intellectual property, licenses, assignments, and other invention-related transactions, guidance for drafting agreements for the transfer of invention rights with in-depth analysis of the various types of contracts and clauses used in patent transfer and assignment transactions.

Free Government Resources

The Patent Act

Manual of Patent Examining Procedure

21 C.F.R.
The Code of Federal Regulations is a codification of the general and permanent rules published in the Federal Register by the Executive departments and agencies of the Federal Government. Title 21 of the CFR contains the rules of the Food and Drug Administration.

37 C.F.R.
The Code of Federal Regulations is a codification of the general and permanent rules published in the Federal Register by the Executive departments and agencies of the Federal Government. Title 37 of the CFR is reserved for rules related to patents, trademarks, and copyrights.

General IP Law and Litigation

Commercial Law of Intellectual Property, Peter A. Alces, David Frisch, Jay Kesan, Harold F. See
Detailed analysis of applicable U.C.C. sections, legislation, and cases in which intellectual property interests have been subject to U.C.C. provisions, including discussion of patent law, trade secrets, copyright law, trademarks, and sales and leases of intellectual property.

Comprehensive and high-level treatise providing first-source information on trade secrets, trademarks, copyrights, patents, licensing and international issues.
Sample and example forms provided in the appendices. The perfect starting point for legal professionals who don’t have extensive knowledge of the practice area.

**Handbook on Intellectual Property Claims and Remedies, Patrick J. Flinn**
Examines the question of whether or not to bring an IP lawsuit from all angles. Provides excerpts from the major IP legislation (Copyright Act, Lanham Act, etc.), a discussion of available remedies, and practical guidance on how to file and respond to claims. The perfect resource to help professionals who may not specialize in IP get started with claim analysis.

**IP Litigator**
Regular briefings on the latest thinking and strategies for successful intellectual property litigation and enforcement. Supplies valuable guidance and practice tips from top litigators and industry experts in patent, copyright, ITC and customs, trademark, and international litigation to keep practitioners up-to-date on the critical issues encountered in intellectual property law.

**Trademark and Copyright Disputes: Litigation Forms & Analysis, Gregory J. Battersby, Charles W. Grimes**
Sample forms and checklists for trademark and copyright disputes, including sample motions, sample discovery documents, sample appeals documents and practice tips on the forms in the treatise. Sample forms on CD.

**International Encyclopedia of Laws: Cyber Law, Jos Dumortier**
A series of national monographs, treating the different legal subjects related to information and communication technology on the basis of a common standard outline. Contains seven main parts in addition to the general introduction: regulation of the ICT Market, protection of Intellectual Property in the ICT sector, ICT contracts, electronic transactions, non-contractual liability, privacy protection, computer-related crime. In addition to the national monographs, contains monographs on supranational and international cyber law issues, such as the monographs on European Union Cyber Law or on International and Global Telecommunications Law. Further provides an International Cyber Law Codex with important international texts in this field.

**Technology Law**

**Computer and Internet Lawyer**
Provides action-oriented guidance by nationally known computer lawyers to resolve the problems that face manufacturers, developers, distributors, and users of computer, telecommunication and online products and services. Each issue alerts the reader to legal and industry trends such as ongoing coverage and analysis of important court cases and includes financing solutions, antitrust developments, securities regulations, licensing concerns, criminal issues, tort law, and more.

**Drafting Internet Agreements, 2nd Ed., Gregory J. Battersby, Charles W. Grimes**
Creation of various agreements for Internet transactions and an explanation of how those agreements are structured as well as how to negotiate the best deals for the business. Provides 40 sample agreements for every area of internet practice.

**Journal of Internet Law**
Provides monthly practical analysis of the legal issues and business developments brought about by the emerging online systems and computer networks and covers such issues as civil liberties in cyberspace, defamation online, online commerce, securities trading online, enforcing American law in an electronic world without borders, use of electronic money, and protection of published materials online.
Analysis of cases and statutes addressing electronic commerce, including electronic contracting, electronic payments, intellectual property, privacy, regulation of e-business (antitrust, securities, taxation, computer security and crime), and e-business administration (records management, electronic evidence, workplace electronic communications, and insurance).

Law of the Internet, 3rd Ed., George B. Delta, Jeffrey H. Matsuura
Analysis of various aspects of law that intersect with the Internet including applying privacy laws to electronic communications, protecting intellectual property online, online financial services and securities transactions, antitrust and other liability and taxation of electronic commerce.

Scott on Information Technology, 3rd Ed., Michael D. Scott
Discussion of how to structure transactions involving computer products and services such as software development, marketing, and licensing. Also covers the many substantive areas that affect technology law practice, including torts, constitutional issues, and intellectual property protections.

Scott on Multimedia Law, 3rd Ed., Michael D. Scott
Analysis of the substantive law with practical advice, including discussions of key topics and various trends and practices in multimedia law including trademark, copyright, moral rights, international aspects, patents, trade names and trade secrets for various types of content including video, videogames, text, still images, digital images, music, and performance.

Scott on Outsourcing Law & Practice, Michael D. Scott
Analysis of the intellectual property laws that intersect in IP licensing, open source software, and other IP agreements, labor and employment laws in both domestic and foreign outsourcing agreements, privacy and security laws and regulations that apply to outsourcing transactions and use of arbitration and mediation for breach of contract.

Copyright Law

Copyright Law Reporter
Comprehensive guide for copyright research, providing full text of federal laws, Copyright Office forms and reference materials, and official circulars, as well as annotated explanations and court decisions in full text. It includes approximately 5,000 of the most important copyright decisions.

Federal Telecommunications Law, 2nd Ed., Peter W. Huber, Michael K. Kellogg, John Thorne
Analysis to ensure understanding and compliance with the complex regulatory landscape of telecommunications (areas include long distance services, wireless services and the internet and data services). Also includes discussion of relevant case law.

Goldstein on Copyright, 3rd Ed., Paul Goldstein
Analyzes everything about copyright law, from fair-use to international copyright issues. Keeps current with developing case law in hot-topic areas of the copyright realm. Written by highly respected author in the copyright world. Includes discussion of new YouTube case ruling on copyright.

Perle and Williams on Publishing Law, 3rd Ed., E. Gabriel Perle, John Taylor Williams, Mark A. Fischer
Multi-volume treatise related to publishing agreements, privacy concerns, copyright issues, and multimedia. Deals extensively with the new media types in publishing and how they’ve affected privacy concerns. The contracting section takes the practitioner clause-by-clause through a typical contract.
Drafting License Agreements, 4th Ed., Michael A. Epstein, Frank L. Politano
Navigate the license agreement drafting process through various practice areas including biotech, securities, music, multimedia and international licensing, among others. Written by contributors from top firms around the country, this practical treatise delves into the ins-and-outs of drafting complex agreements and covers a wide array of different areas of the law and how licensing agreements fit into them.

Drafting Technology Patent License Agreements, 2nd Ed., Michael J. Lennon
Step-by-step guide for the implementation of patent licensing programs for computers, electronics, and telecommunications, which also clarifies the issues involved in the enforcement and litigation of these patents.

Helps those drafting licensing agreements involving intellectual property to maximize the commercial value of intellectual property rights and to minimize antitrust risks. Co-authored by Herb Hovenkamp, author of Antitrust Law.

License Agreements: Forms and Checklists, Gregory J. Battersby, Charles W. Grimes
Sample forms and checklists for licensing practice, including sample motions, sample discovery documents, sample appeals documents and practice tips on the forms in the treatise. Checklists ensure that the practitioner has all bases covered.

Licensing Journal
In-depth, practice-oriented licensing guidance by top attorneys in intellectual property, computer technology, and entertainment law. Contains valuable strategies, cautionary tips, and creative approaches to structure the most lucrative and secure licensing deals and illustrates: how to negotiate the best merchandising license agreement; how to set up successful licensing arrangements in Asian markets; how to use shrink-wrap licenses and standard form agreements to protect proprietary interest in software and information transactions; new techniques for valuating licensed technology; how to minimize risk when doing business on the Internet; how to protect you clients from state and federal franchise lawsuits; and more. Plus features ongoing coverage of critical developments in trademark law, licensing around the world, royalty rates and the latest business developments.

Licensing Royalty Rates, Gregory J. Battersby, Charles W. Grimes
Contains practical information on the standard licensing rate ranges for a variety of products and categories of goods. Includes case summaries of important licensing cases from the prior year, articles on topics such as royalty rate valuation and trends in royalty rates, helpful charts and a section on trends to keep up to date on latest developments over the year.

Licensing Update, Gregory J. Battersby, Charles W. Grimes
Article-based annual related to hot topics in licensing. Written by practitioners, topics have included developments in international licensing, developments in multimedia, an examination of the licensing market, and trade secret licensing. As an article-based publication, it changes yearly. While some topics remain from year to year (international developments), the jurisdictions change often.
