

# Printing Selected Text

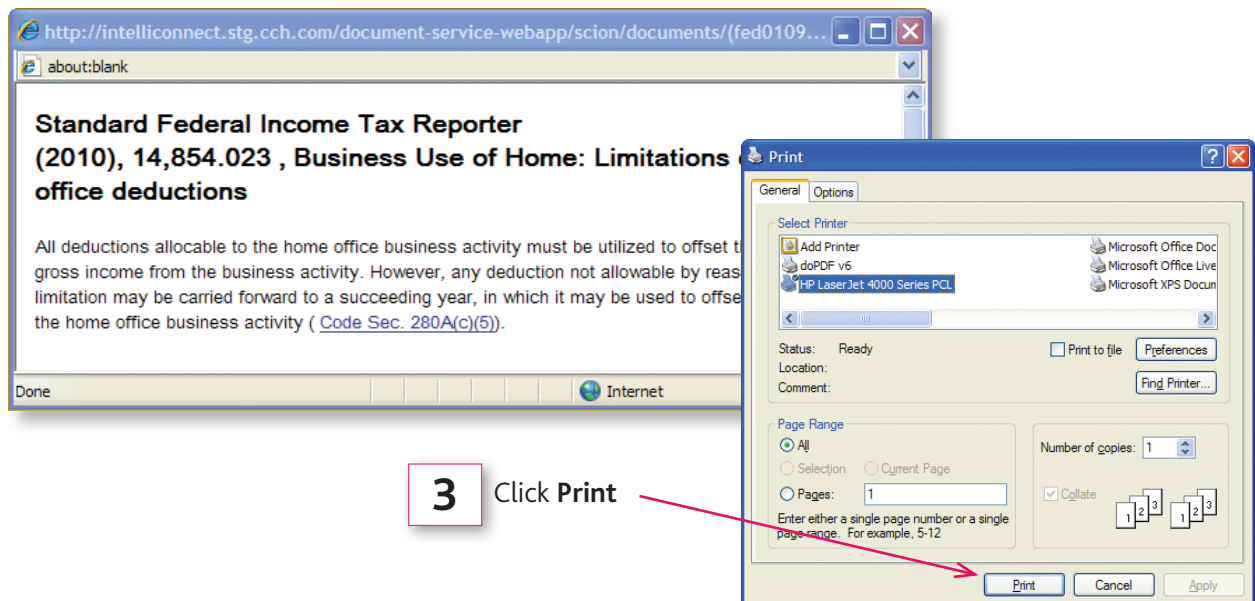

Printing Selected Text on IntelliConnect is as easy as 1, 2, 3.

**1** Select the text you would like to print.

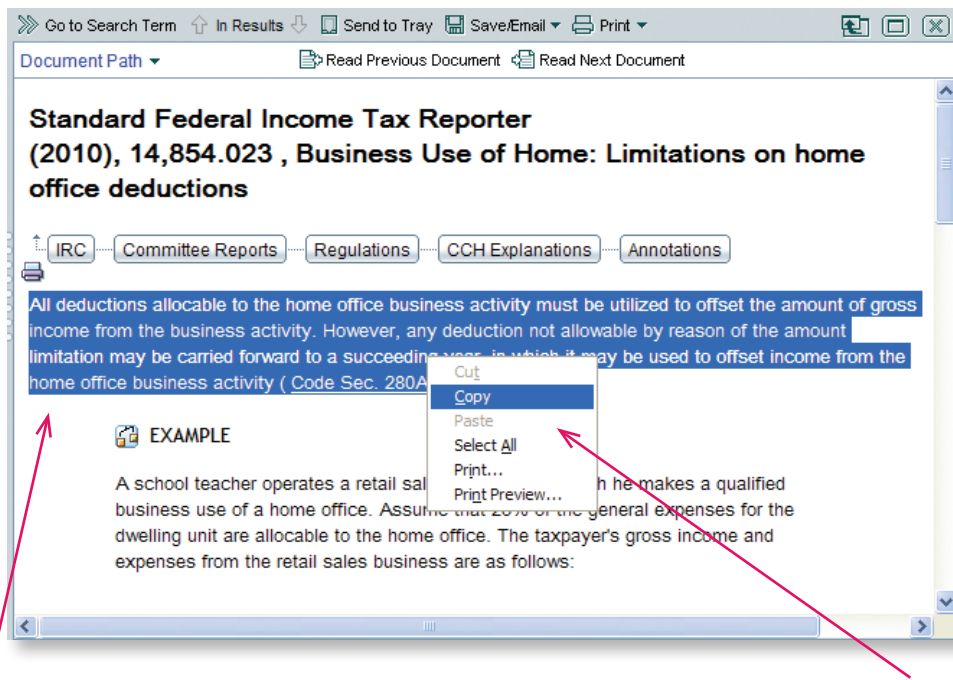

**2** Click the **print icon** that appears just above selected text, or click print and choose **Print selected text** in the drop down menu.

- A new browser window opens with your selected text and the original document title
- Your system's print commands will also appear

You may use your system's copy/paste feature to print or save selected text.

1. **Select the text** you would like to copy
2. **Right-click** on the selected text to bring up your system's commands
3. Click **Copy**

- When using the copy/paste feature, it is important to note that the title of the original document is not automatically carried over with the copied text as it was when using the Print Selected Text feature.
- If you would like the title of the document to accompany the copied text, you will need to select, copy and paste it as well.
