Warren Statement on No Trump Ethics Provision in Crypto Bill

Washington, DC – United States Senator Elizabeth Warren (D-Mass.), Ranking Member of the Senate Banking, Housing, and Urban Affairs Committee, released the following statement on the Banking Republican majority’s new text of crypto market structure legislation to be marked up this Thursday:

“This bill puts investors, our national security and our entire financial system at risk – and it will turbocharge Donald Trump’s crypto corruption. In just one year in office, the President and his family have raked in at least \$1.4 billion in gains from crypto deals alone, and yet this bill stunningly includes zero provisions to prevent that. The American people are watching. No Member of the Committee should support a bill that fails to stop the massive conflict of interests posed by Donald Trump and his family’s crypto ventures.”
