Dealers will update the in-vehicle infotainment system software.

Mitsubishi Motors North America, Inc. (MMNA) is recalling about 89,907 2022-2023 Outlander and 2023 Outlander PHEV vehicles because, due to a software error in the in-vehicle infotainment system (A-IVI), the backup camera rearview image may not appear on the display. As such, these vehicles fail to comply with the requirements of Federal Motor Vehicle Safety Standard (FMVSS) No. 111, *Rear Visibility*. A rearview camera that does not display an image can reduce the driver's rear view, increasing the risk of a crash or injury (*NHTSA Recall Notice*, No. 23V345, Report receipt date: May 15, 2023).

Remedy. Dealers will update the A-IVI software, free of charge. Owner notification letters are expected to be mailed June 20, 2023.

Contact information. Owners may contact MMNA customer service at 1-888-648-7820. MMNA's number for this recall is SR-23-001. Owners may also contact the National Highway Traffic Safety Administration Vehicle Safety Hotline at 1-888-327-4236 (TTY 1-800-424-9153) or go to www.nhtsa.gov.
