CFTC to Accelerate Publication of Backlogged COT Data

December 09, 2025

WASHINGTON — The Commodity Futures Trading Commission is accelerating the publication of Commitments of Traders reports that were interrupted during the lapse in federal appropriation. The revised timeline will eliminate the report backlog by Dec. 29, 2025. The CFTC previously projected data to be current by January 23, 2026.

The reports will continue to be published in chronological order at an increased frequency while maintaining data integrity. This process is consistent with prior post-shutdown publishing.

The revised publication schedule is below and will be updated as necessary. Check CFTC.gov (https://www.cftc.gov/MarketReports/CommitmentsofTraders/index.htm) for the most up-to-date information.
